- Build native mobile apps using JavaScript and React

<https://github.com/nanohop/react-indy>

Framework Comparison

Render

```
render() {  
  return (  
    <View style={{flex: 1}}>  
      <Image source={logoImage} style={{height: 120, width: 120}} />  
      <Text style={{fontSize: 12, color: '#ffffff'}} >  
        Hello World!  
      </Text>  
      <TouchableOpacity onPress={this.sayHello}>  
        <Text>Say Hello!</Text>  
      </TouchableOpacity>  
    </View>  
  )  
}
```

Styles

```
import { StyleSheet } from 'react-native';

...

const styles = StyleSheet.create({
  root: {
    flex: 1,
    justifyContent: 'center'
  },
  buttonText: {
    color: 'rgba(0,0,0,0.5)',
    fontSize: 20
  }
});
```

Platform Specific

```
import {  
  Platform  
} from 'react-native';  
  
...  
  
headerText: {  
  fontSize: (Platform.OS === 'ios' ? 20 : 24),  
  marginBottom: 10,  
  padding: 5  
}
```

Native Features

```
import Camera from 'react-native-camera';

...

<View style={styles.container}>
  <Camera
    ref={(cam) => {
      this.camera = cam;
    }}
    style={styles.preview}
    aspect={Camera.constants.Aspect.fill}>
    <Text style={styles.capture} onPress={this.takePicture}>
      [CAPTURE]
    </Text>
  </Camera>
</View>
```
